

# sitefinity CMS Datasheet

Sitefinity CMS is a flexible ASP.NET-based content management platform that is used for the construction and management of commercial websites, community portals, intranets, etc. The product's unique architecture leverages the .NET development patterns including master pages, templates, standard user controls, themes and CSS. Sitefinity CMS is engineered with flexibility and extensibility in mind to give developers the freedom they need to integrate legacy applications or use custom 3rd party controls and modules.
